Penetration Test Report

Örnek A.Ş. Web Uygulaması Testi

CRITICAL

Client	Örnek A.Ş.
Authorized by	Ayşe Yılmaz (BT Müdürü)
Authorization reference	SÖZ-2026-014
Scope	ornek.com
Started	08.11.2026 11:01 UTC
Finished	15.06.2026 14:30 UTC
Report ID	f14ff03e-bd50-4b4b-8492-c93f0ca7eb03
Tool	Sefalet Pentest 0.1.0.dev0

1. Executive Summary

A total of 4 findings were identified, of which 3 are high/critical severity and should be prioritized.

Findings by severity

Critical	High	Medium	Low	Informational
2	1	0	1	0

2. Scope and Methodology

ornek.com — recon, misconfig, known_vulns, web_safe

3. Findings Overview

ID	Finding	Severity	CVSS	Confidence
PT-CVE-001	CVE-2021-42013: Apache path traversal and RCE	**Critical**	9.8	Probable (manual verification advised)
PT-EXP-002	Environment file (.env) exposed	**Critical**	9.1	Confirmed
PT-WEB-001	CORS misconfiguration	**High**	7.5	Confirmed
PT-REC-002	Software versions disclosed	**Low**	3.7	Confirmed

4. Detailed Findings

PT-CVE-001 · CVE-2021-42013: Apache path traversal and RCE	
Severity	Critical · CVSS 9.8
Confidence	Probable (manual verification advised)
Location	ornek.com
Evidence	Tespit edilen Apache 2.4.49, CVE-2021-42013 icin etkilenen aralikta.
Description	An incomplete fix leading to path traversal and RCE. Patch status must be verified manually.
Recommendation	Update to a fixed version or verify the patch.
References	https://nvd.nist.gov/vuln/detail/CVE-2021-42013

Note: This finding is based on a safe indicator and was not automatically exploited. Manual verification is required before treating it as a confirmed vulnerability.

PT-EXP-002 · Environment file (.env) exposed	
Severity	Critical · CVSS 9.1
Confidence	Confirmed
Location	https://ornek.com/.env
Evidence	GET /.env -> HTTP 200; icerik imzasi eslesti.
Description	The file may contain database passwords and API keys.
Recommendation	Block access and rotate any leaked secrets.
References	https://owasp.org/

PT-WEB-001 · CORS misconfiguration	
Severity	High · CVSS 7.5
Confidence	Confirmed
Location	https://ornek.com
Evidence	Rastgele Origin kimlik bilgisiyle yansitildi.
Description	Any origin can make credentialed requests.
Recommendation	Restrict the origin to trusted domains.

PT-REC-002 · Software versions disclosed	
Severity	Low · CVSS 3.7
Confidence	Confirmed
Location	https://ornek.com
Evidence	Acikca sunulan surumler: Apache 2.4.49, PHP 7.1.0.
Description	Version information eases attacker reconnaissance.
Recommendation	Hide version information.

5. Limitations and Legal Notice

• This test was conducted under the authorization referenced on the cover page, within the defined scope and time window.

• Testing used non-destructive methods: no data was modified or deleted, no credentials were attempted, and no action that could cause service disruption was performed.

• Findings marked 'Probable' are based on safe indicators and require manual verification; they must not be presented as confirmed vulnerabilities.

• The absence of findings does not mean the system is secure; the test covers only the in-scope targets and the defined testing phases.

• This report is intended for the client and authorized parties only and must not be shared without permission.
